

San Gabriel Valley Energy Wise Partnership

AGENDA OF THE CITY STAFF ENERGY WORK GROUP MEETING Wednesday, April 24, 2019 – 1:30 PM

PRELIMINARY BUSINESS

1. Attendee Introductions

Alexander Fung, Management Analyst, San Gabriel Valley Council of Governments

BRIEF PRESENTATIONS

2. Direct Install Program

Amri Christianto, Program Manager, Southern California Edison

Mondel Pettaway, Programs and Operations Manager, FCI Management Consultants

3. Utility Incentives and Rebates

Tina Valore, Account Manager, Southern California Edison

Rob Bailes, Account Executive, Southern California Gas Company

Jamie Lopez, Account Executive, Southern California Gas Company

DISCUSSION AND UPDATE ITEMS

4. City Project Updates & Best Practices

Various City Representatives

5. Southern California Edison

Scot Mann, Program Manager, Southern California Edison

Tina Valore, Account Management Senior Specialist, Southern California Edison

6. Southern California Gas Company

Jeannie Kong, Program Manager, Southern California Gas Company

Rob Bailes, Account Executive, Southern California Gas Company

Jamie Lopez, Account Executive, Southern California Gas Company

7. San Gabriel Valley Council of Governments/San Gabriel Valley Energy Wise Partnership

Katie Ward, Senior Management Analyst, San Gabriel Valley Council of Governments

Alexander Fung, Management Analyst, San Gabriel Valley Council of Governments

Peter Duyshart, Project Assistant, San Gabriel Valley Council of Governments

Kathleen Mitchell, Graduate Intern, San Gabriel Valley Council of Governments

ANNOUNCEMENTS

ADJOURN

Direct Install Program

**Amri Christianto, Southern California Edison
Mondel Pettaway, FCI**

Commercial Direct Install Program

San Gabriel Valley City Staff Energy Work Group Meeting
April 24, 2019

2019 Commercial Direct Install Program

The Commercial Direct Install Program provides no cost energy efficiency equipment to eligible commercial customers with demand between 0 kW – 199 kW.

Eligibility Requirements:

- Active SCE account
- Demand between 0 kW – 199 kW
- Eligible existing conditions

2019 Commercial Direct Install Program

Eligible Measures

- LED T8 Lamps
 - Existing condition: T8 linear fluorescent with compatible electronic ballasts.
- LED R/BR, Globe, Down Light, Candelabra, Par30, and Par 38 screw in lamps
 - Existing condition: Incandescent, CFLs lamps.
- Auto Closer for Coolers
- Auto Closer for Freezers
- Insulate Bare Suction Pipes
- All eligible measures do not have co-pay

2019 Commercial Direct Install Program

How it works?

- Provide a list of partnership city owned buildings (service account # and addresses) to Scot.
- DI PM will conduct an eligibility review for each site then upload and distribute eligible sites to DI contractor.
- DI contractor will reach out to city point of contact to schedule audits of eligible sites. City point of contact will need to be available and have access to the different sites.
- DI contractor will conduct the audit and determine the opportunities at each eligible site. DI contractor processes eligible site in database.
- Project has a chance of getting selected by SCE for pre on-site inspection.

2019 Commercial Direct Install Program

How it works? Continued

- After passing the pre on-site inspection stage, DI contractor will schedule the installation with city point of contact.
- DI contractor completes the installation and conduct their own inspection to conduct a final count of the measures installed.
- City point of contact will need to sign off on remaining paperwork. DI contractor processes project in database.
- Project has a chance of getting selected by SCE for post on-site inspection.
- After passing the post on-site inspection stage, project is complete.

*Minimum 3 touches and potentially up to 5 touches at each site.

The background of the slide features a vibrant, stylized illustration. In the foreground, a lush green hill slopes downwards from the left, with a small, clear stream flowing over rocks at the bottom right. Behind the hill, a city skyline is visible, featuring several tall, modern skyscrapers in shades of blue and grey. The sky above is a bright, clear blue with soft, white clouds. The overall aesthetic is clean, modern, and environmentally friendly.

SCE Utility Incentives and Rebates

Tina Valore, Southern California Edison

SCE Programs and Offerings

San Gabriel Valley Cities Working Group

April 24, 2019

1

Energy for What's Ahead™

SCE Express and Customized Solutions

- Express
 - Rebate program for already purchased and installed equipment
 - To qualify for incentive, all installed equipment must:
 - Be new and meet all measure-specific eligibility requirements listed in the latest Solutions Directory
 - Be high efficiency equipment above mandated codes or industry standard practice
 - Be fully installed and operational
 - The maximum rebate will be up to 100% of the equipment costs
 - To apply and for the most up-to-date measure and program information available please visit **sceonlineapp.com**

2

Energy for What's Ahead™

SCE Express and Customized Solutions

- Custom
 - Each project must go through a rigorous inspection and approval process both before equipment is ordered and after equipment installation
 - To qualify for incentive the Early Screening Document (ESD) must be completed and Ready to Proceed
 - In the ESD, basic customer, measure, site history, and project development information is provided to ensure that nothing present would make the project ineligible
 - All new Custom incentive applications require an ESD classified as Ready to Proceed prior to submittal
 - All Custom project must also adequately demonstrate and provide evidence for program influence
 - Program influence, per the California Public Utilities Commission, shows for each measure in a project that the SCE Custom Incentive program incentives and funding *influenced* the customer to install energy efficiency measures above and beyond what that customer would have otherwise installed and also above any code or industry standard practice
 - For specific examples of what kind of evidence is needed for each type and size of project to demonstrate influence, refer to the Energy Efficiency Project Influence Job Aid available on the Customized Solutions page at sceonlineapp.com
 - The maximum rebate will be up to 50% of the total project cost
 - To apply and for the most up-to-date measure and program information available please visit sceonlineapp.com

3

Energy for What's Ahead™

Express and Custom Measures for Cities

- Variable Frequency Drives (VFDs) in various pumping and HVAC installations
 - HVAC
 - Express – AC-55411 & AC-91987 for VSDs on condenser and chilled water pumps controls; AC-97352 for VSDs on HVAC fans
 - Custom –

AC-19795	Exhaust fan VFD controls for CO DCV in enclosed parking structures - add-on equipment	\$0.12	\$150
AC-43210	Variable-speed drives for chiller compressor	\$0.12	\$150
AC-65847	Variable-speed drives for cooling tower fan	\$0.12	\$150
AC-69858	Variable-speed drives for hot water pump motor	\$0.12	\$150
AC-74984	Variable-speed drives for condenser water pump motor	\$0.12	\$150
AC-78722	Variable-speed drives for ventilation fan **	\$0.12	\$150
 - Pumping
 - Custom – PM-35845 for Fluid Pump VFD and many other depending on the type and use of pumping equipment
- Retro-commissioning
 - Custom solution that requires significant data-logging and reviews but currently provides good energy efficiency opportunities, especially in areas like office buildings that have already installed some energy efficient technology but are looking to continue to improve
- Midstream Point-of-Purchase Program
 - Best program option for energy efficient lighting with multiple interior and exterior LED measures
 - Incentive provided directly to distributor and passed along to customer via low and no-cost energy efficiency solutions

4

Energy for What's Ahead™

Demand Response

- DR programs offer incentives for reducing your electricity use when the demand for electricity is high
- You can participate via multiple different programs that offer discounted rates, incentives, or bill credits for participation
- DR Programs
 - Automated Demand Response (Auto-DR) Technology Incentive for installation of enabling DR technology along with participation in another DR program
 - Critical Peak Pricing (CPP) and receive bill credits when you reduce energy use during an event
 - Capacity Bidding Program (CBP) will allow you to bid into DR event and receive incentives based on the amount you bid and the actual amount reduced
 - Summer Discount Plan (SDP) offers monthly bill credits for allowing SCE to install a device to turn off or cycle AC devices during an event

5

Energy for What's Ahead™

SCE Pump Test and Hydraulic Services

Designed to help pumping customers make informed decisions about improving inefficient pumping systems and operations.

The solutions are communicated in a technical report providing recommendations derived from onsite pump tests and/or direct observations of processes.

Also offering fee based predictive maintenance services.

- Municipal Water Applications
- Wastewater Facilities
- Golf Course Irrigation Plants

Since 1911, a comprehensive water and energy management service for the efficient delivery of water for SCE customers

6

Energy for What's Ahead™

Pumping Measures

Pumping measures include, but are not limited to:

Measure	Common Applications/Examples	Solution Category
Pumping System Overhaul	Efficiency improvement primarily resulting through work performed on either or both the pump bowl/volute and impeller. Plant efficiency also improved through well conditioning, motor efficiency improvements, etc.	Customized
Variable Frequency Drive	Energy efficiency gained through control of motor/pump speed in applications when there are operational or total head (pressure) variations.	Customized Deemed: Agriculture
Pumping Plant or System Optimization	Redesign of existing pumping (pump) systems meet existing conditions at higher efficiency (BEP). SCADA system upgrades for pumping prioritization control, zone reconfigurations, right sizing pumps, etc.	Customized
High Efficiency Pump	Based on Pump Energy Index (PEI) established by Department of Energy (DOE). Clean water pumps. Specific to 5 pump types 1 to 200 HP.	Deemed
Control Valve Replacement	Example: Reducing differential pressure through valve replacement. Savings will depend on total head reduction and hours of operation.	Customized
Piping Replacement	Energy efficiency through reduced frictional differences of piping options.	Customized
7		Energy for What's Ahead™

On-Bill Financing

- On-Bill Financing (OBF) is a finance (loan) program designed to facilitate the purchase and installation of qualified energy-efficiency measures by eliminating the up-front costs through repayment the customer's monthly Edison Bill.
- The monthly loan repayment values are estimated based on the amount of projected energy savings.
- The benefits the OBF program offers:
 - 0% interest loans
 - No additional fees or loan costs
 - Convenient loan repayment via their utility bill

Who can apply for On-Bill Financing?

To participate in OBF, business customers must complete the installation of their energy-efficiency projects by applying for one or more of the following incentive programs:

- Express Solutions (Pending Installation)
- Customized Solutions
- Third Party Programs
- Local Government and Institutional (Public Sector)
- Behavioral, Retrocommissioning and Operational programs (formerly known as RCx)
- Midstream Point of Purchase (MPOP)- **NOT CURRENTLY AVAILABLE**

9

Energy for What's Ahead™

OBF Loan Amount and Term Limits

Customer Segments	Individual SA	Bundled SAs	Loan Terms
Governments and Institutions (G&I)	Min: \$5,000 Max: \$250,000	Min: \$5,000 Max: \$250,000	Up to 10 Years
Multifamily	Min: \$5,000 Max: \$250,000	N/A	Up to 10 Years
Business	Min: \$5,000 Max: \$100,000	N/A	Up to 5 Years

- Government and Institutional customers are eligible for loans of up to \$1 million per Service Account for large energy savings projects.
- Loan caps are per Service Account.
- All customers are limited to 10% of the loan budget.

10

Energy for What's Ahead™

Charge Ready Program

12

Energy for What's Ahead™

Deployment Overview

- Charge Ready aims at reducing the cost and complexity of deploying charging stations for our customers

Infrastructure deployed by SCE
(all costs covered by the Program)

Owned and operated by participating customers
(rebate against hardware and installation costs)

13

Energy for What's Ahead™

Key Features

Scope and Duration

Deploy electric infrastructure to serve EV charging stations at long dwell-time locations (workplace, multi-unit dwellings, fleet, and destination centers):

- Phase 1 pilot approved by Public Utilities Commission to serve at least 1,000, and all program funds have been reserved.
- Bridge funding to extend the Phase 1 pilot was approved on December 13, 2018, to serve at least an additional 1,000 ports. Total funding approved was \$22M. Minimum of 10 charging stations per site

Pilot Costs

- All electric infrastructure costs (utility-side and customer-side of meter) covered by the Program
- **25%-100%** rebate against charging station base costs (hardware and installation)

Disadvantaged Communities

- Charge Ready deployment:
 - Minimum of 5 charging stations per site in disadvantaged communities
 - 100% rebate against charging station base cost

Multi-Unit Dwellings

- Multi-Unit Dwellings:
 - Minimum of 5 charging stations per site for MUDs in disadvantaged and non-disadvantaged communities.
 - 50% rebate against charging station base cost in non-DAC
 - 100% rebate against charging station base cost in DAC

14

Energy for What's Ahead™

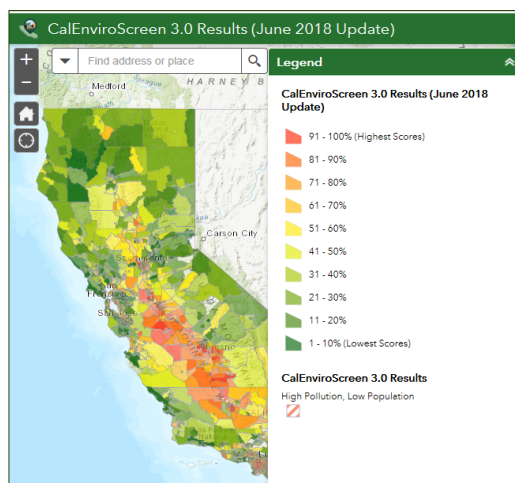

Disadvantaged Communities

Areas disproportionately burdened by and vulnerable to multiple sources of pollution, as designated by CalEPA

CalEnviro is used to determine if a site is located within a DAC

Top quartile of all census tracts in California, as ranked by

CalEnviroScreen 3.0

15

Energy for What's Ahead™

Customer Eligibility and Participation

Customer Eligibility

- Qualify as a non-residential customer (business, government)
- Meet the program's guidelines on EV adoption
- Own, lease, or operate a long-dwell time parking site (4+ hours)
- Provide a grant of easement by the property owner
- Deliver proof of purchase of qualified charging equipment

Site Approval

- Granted by SCE on a first-come, first-served basis (multiple criteria, including grid impacts)
- Requires agreement from customer on number of charging stations and location within site (as proposed by SCE)
- Minimum of ten charging stations (reduced to five in Disadvantaged Communities and MUDS).

Customer Rights and Responsibilities

- Own and operate qualified charging stations (10 years)
- Pay for operating costs (energy, maintenance/repairs, EV network, including non-PII data sharing and DR)
- Must join future DR programs in connection with Charge Ready

16

Energy for What's Ahead™

Qualified Charging Stations

- Two charging levels available for Charge Ready:
 - Level 1 (120 V)
 - Level 2 (208 V – 240 V): Communication/DR and metering capabilities
- Only SCE-approved vendors may participate in the program. They provide:
 - Qualified charging stations that meet the program's technical requirements
 - Installation of charging stations
 - EV network services for data management and future DR programs (Level 2 only)
- Customers may procure maintenance and repair services from any vendor of their choosing

The up-to-date list of approved vendors and approved charging stations is available on the Charge Ready website (on.sce.com/ChargeReady)

17

Energy for What's Ahead™

Charge Ready Financial Incentives

- SCE installs and maintains the complete electric infrastructure serving charging stations at no cost to participating customers (before and after the meter)
- SCE provides a rebate to offset charging station costs (hardware and installation) for each charging station category (Level 1, Level 2)
 - A rebate calculation tool can be found on the Charge Ready Landing Page

Segment	Rebate (% Base Cost)
All segments in Disadvantaged Communities	100%
Multi-unit Dwellings – Non DAC	50%
Multi-unit Dwellings - DAC	100%
All other segments (workplace, fleet, destination centers)	25%

Charge Ready rebates combined with other rebates or programs cannot cover more than 100% of the charging station costs

Charge Ready Program

To support California's zero-emission policies, we're kicking off the **Charge Ready Program** by deploying infrastructure to serve qualified electric vehicle (EV) charging stations throughout our service territory. Watch the video to learn more about the program, a potential rebate, and more. Plus, download the [Charge Ready Program Participation Package](#) for complete details. Ready to enroll?

[Get Started >](#)

Try the [Charge Ready Rebate Calculator](#) and determine your potential rebate amount!

Program Requirements

- Qualify as a non-residential customer
- Meet the program's guidelines for existing and future EV adoption
- Own, lease, or operate a site that provides long dwell-time parking (where cars are typically parked for four hours or more)
- Provide a grant of easement by the property owner
- Deliver proof of purchase of qualified charging equipment

What to Have Ready

- Your Customer Account Number and Service Account Number, if you are currently an SCE customer
- Federal Tax ID Number
- County Tax Assessor Parcel Number (if applicable)
- Name of the Authority Having Jurisdiction (AHJ) to issue building permit approvals (if applicable)
- Proposed charging station location for site (optional)
- PDF of property site plan (optional)
- Civil plan, aka base map, with existing utilities (optional)

Questions?

SCE Time-of-Use Rate Changes

Tina Valore, Southern California Edison

SCE Time of Use Rate Changes

April 24, 2019

1

Energy for What's Ahead™

How Time-of-Use (TOU) Rates Work

With TOU, the cost of electricity changes depending on the time of day you use it. Instead of a single flat rate for electricity use, the cost of electricity on a TOU rate varies based on the time of day, day of week, and season in which it is used.

With TOU rates, **when** you use electricity is just as important as **how much** you use.

Electricity is billed by **kilowatt demand** and **kilowatt hour** charges.

2

Energy for What's Ahead™

Current TOU Periods

Summer Time-Of-Use Hours

Begins June 1 and continues through October 1.

Winter Time-Of-Use Hours

Begins October 1 and continues through June 1.

3

Energy for What's Ahead™

Upcoming Changes in TOU Peak Periods

For the first time in 30 years, SCE's standard TOU periods for non-residential customers are changing in March 2019

Default Critical Peak Pricing for Bundled TOU-GS-1, TOU-GS-2 and TOU-PA-3 customers

- Accounts with at least 24 Months of interval usage will be affected by CPP default

Net Energy Metering Successor Tariff (NEM-ST) OIR decision allows existing NEM accounts to be grandfathered and TOU OIR decision allows certain solar generation accounts to be grandfathered on existing TOU periods

4

Energy for What's Ahead™

Upcoming Changes in TOU Peak Periods*

- Shifts daily “peak” period to 4-9pm (currently noon to 6pm)
- Introduces “super off-peak” period from 8am-4pm on all winter days
- Introduces time-differentiated weekend charges
- Maintains existing seasonal definitions (Summer: June-Sept; Winter: Oct-May)

* New Time-of-Use (TOU) peak period applies to “standard” TOU rates defined as follows: TOU-8, TOU-GS-3, TOU-GS-2, TOU-GS-1, TOU-PA-3, & TOU-PA-2. CPP events occur on weekdays and will take place 12 times per year.

5

Energy for What's Ahead™

Optional TOU Time Period –Ag & Pump Only

New Optional Rate AGRICULTURAL AND PUMPING TOU PERIODS 5TO8

- In addition to the 4-9 pm standard option, a 5-8 pm option will be available to Ag & Pump customers
- Daily “peak” period will be from 5-8 pm
- Introduces “super off-peak” period from 8 am-5 pm on all winter days
- All other aspects mirror the 4-9 pm standard time periods

6

Energy for What's Ahead™

How to Integrate TOU Peak Period Changes into your Business Plan

- Evaluate your usage to identify operations primarily between 4 p.m. - 9 p.m. (most likely to be impacted)
- Talk to your Account Manager about load control, energy efficiency, rate options, energy management solutions, and how to shift peak load to lower cost periods
- Plan and prepare for operational changes that might be required in anticipation of future time period and rate changes
- Self Service Rate Analysis Tool (March 2019)
- ***Saving Tip*** - You can save on your electric bill if you are able shift most of your energy use to the Off-peak hours in the summer and super off-peak hours in the winter.

7
